## WHAT ARE THE GOALS AND TRACKS?

Participants are encouraged to form teams to creatively approach solutions to one of the tracks below. Individual registrants are welcome to apply and will be assigned to a team. Once you identify a track, your team will have 3 weeks to develop a prototype solution. Mentors will be on hand to help you brainstorm. Once complete, our judges will score the solutions and prizes will be awarded!

### CONSERVATION

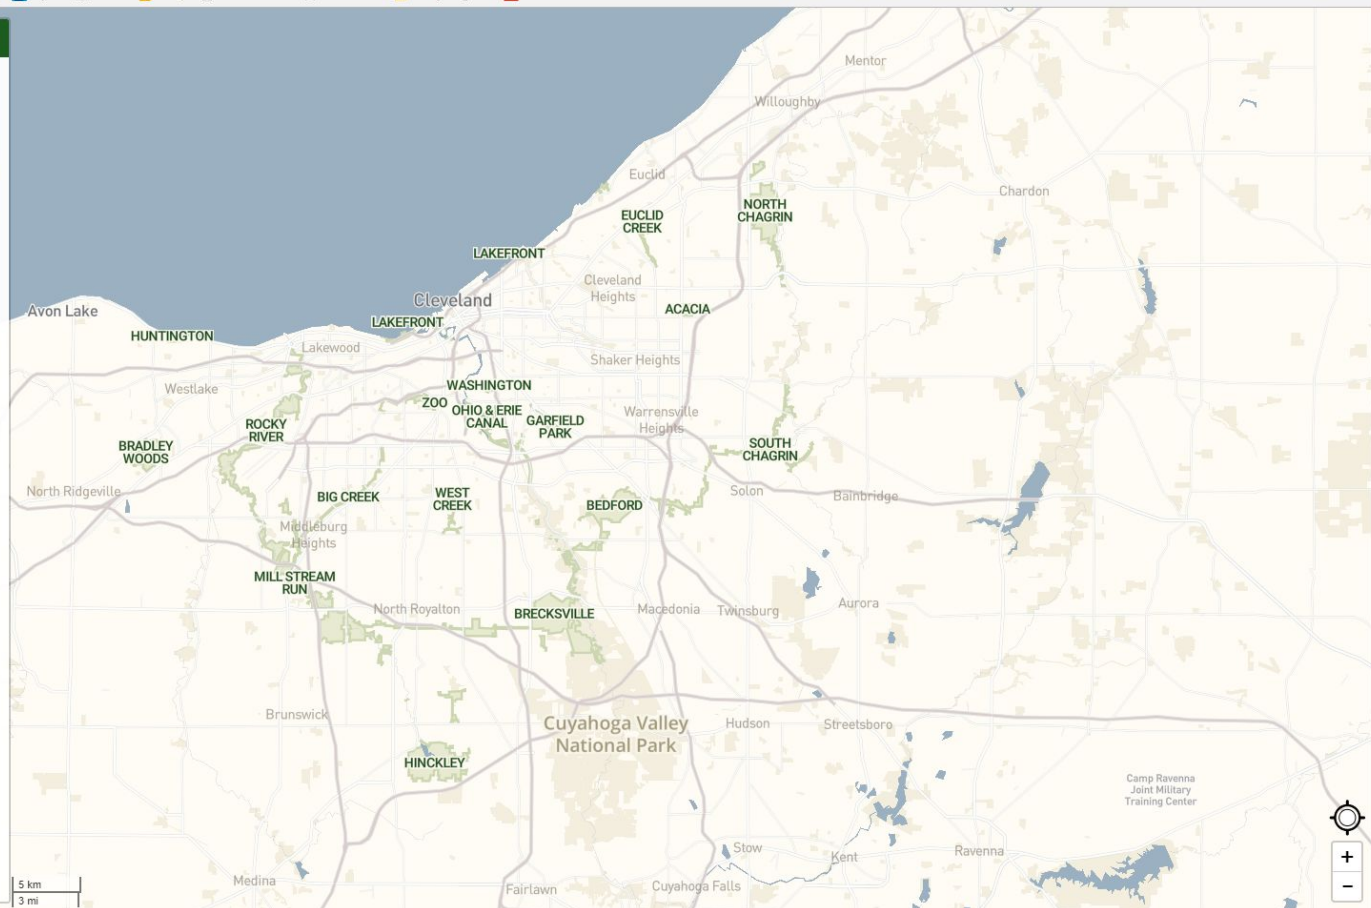

### NATURE EDUCATION

**How can nature education be enhanced with technology? (Track Mentor: Jake Kudrna, Outdoor Experiences)**

- Park guests frequently have questions about things they've seen on our reservations. How can they quickly get their questions answered by one of our naturalists? Their questions may be about something they've seen, heard, smelled, or touched.
- Cleveland Metroparks has many regular visitors to the parks. How can technology be used to connect them with each other, encourage more frequent use, or bring new guests to the park?
- There are many communities in the Cleveland area who do not have direct access to Cleveland Metroparks. How can we bring the parks & natural education to these under-served communities?
